- Aims to assemble the high-resolution, multi-wavelength observations needed to **calibrate the *ad-hoc* treatment of AGN feedback in cosmological simulations** using **direct observations of feedback** in addition to aggregate galaxy properties
- Specializes in high-resolution, multi-wavelength **X-ray, optical, mm, and radio observations of stellar and AGN feedback in galaxies and galaxy clusters**, utilizing telescopes such as JWST, ALMA, *Chandra*, LOFAR, and HST
- Proficient in **computational astrophysics**, particularly in bridging the detailed physical outputs from **hydrodynamical simulations** with computationally inexpensive, flexible **semi-analytic models** of galaxy formation and evolution.
- Experience conducting ethnographic and archival research on the **history of astronomy**, examining the roles of race, colonialism, and labor in the development of astronomical observatories in the Global South
- Extensive experience **mentoring** and **teaching** undergraduate and high school students, including leading workshops on data analysis methods and graduate school preparation, with a focus on **supporting underrepresented students in STEM**

## Teaching Experience

<b>ASTRON 1: The Big Questions of Astronomy</b> , <i>Teaching Fellow</i> , Harvard College	Jan. – May. 2023
Select Review from Median 5.0/5.0 Student Evaluation Rating: “Osase was an amazing TF! One experience that really stands out to me is during one lab, we were observing the Big Dipper [...] Osase went out of her way to help me identify the Big Dipper, using a variety of methods until I was able to see it. I was so impressed by her determination [...] She was also really great at explaining concepts in the class, and helping students arrive at answers to the homework questions without just giving them answers [...] She was also [...] a warm and friendly and approachable TF in general”	
<b>ASTRON 35S: Fundamentals of Astronomy</b> , <i>Teaching Fellow</i> , Harvard Summer School	Jun. – Aug. 2020
Select Review from Median 5.0/5.0 Student Evaluation Rating: “Osase always made sure every student in the course understood the course’s subjects. She was always both patient and informative, pushing others to do their best.”
